

## Save Us

From First to Last

We must be suicidal  
Because we die every night  
Without a fight  
It's all in the name of passion  
Well that's your vice  
Take a deep breath  
Fuck being polite  
We're smothered with the tension  
It is just an extension of our dear hearts

Just wait it out  
Just wait it out  
It will come to you

You're beautiful  
You're beautiful inside  
Oh

Let the world  
Oh, let the world hear us now

Better trash be profound  
[?] what would be a better driver now  
Now, now

Save us, save us, save us

You want to be cured?  
Well now's your fucking time

[?] Tell them all where to get down,  
this doesn't give her hidden skills,  
lets bring this party/body to ruin,

Do you think this is a joke?  
Grab that rafter by the throat and  
squeeze, squeeze, squeeze

Save me sell me fuck me  
Tell me what I can do for you

Save me save me save me  
Tell me what I can do for you

Save us, Save us, Save us
