

## Individuals

### From Our Hands

we were starved for hopes and dreams  
so we came up with science  
even more

had not we seen the things we had  
would it have changed our present?  
do we know?

dont you dont lie to me  
we're far from knowing it all  
dont you dont lie to me

you made up the laws for everyone  
that draw my attention  
you said, it's right for you  
so, why is it killing us?  
We made up the laws for everyone  
so far from perception  
we are the same for you  
but we're individuals

would it change the way i feel  
if i could see the colors?  
all-around  
would it've taken so many years  
with only eight fingers on which to count?

we build up the cages  
we build up the cages  
and we swallow what they think  
and we swallow what they think

we build up the cages  
we build up the cages  
we are the rats, our wheels are spinning

we are all in the gutter  
we are all in the gutter
