

Contagion

Front Line Assembly

We are contagion
You and I
We are contagion
We are contagion
You and I
We are contagion
We are contagion

To draw the line, to break the chain
Or tolerate with token accusations
To parasite the mutual blame
Or amputate the stolen generations

You and I, We are contagion
Borne on sickest moves
Disease by inclination
Dumb animal improved

The toxic shock, the system plague
Annihilates from pure contamination
To pre-evolve, to die outphased
Or plead the case for ceaseless isolation

You and I, We are contagious
The poisons break the skin
Ambition leaves us helpless
The waste of faith tomorrow brings

You and I, We are contagion
We are contagion
You and I
