

# Far Beyond

Frozen Crown

Who we are, I'm guessing who we are  
If just a spark or a thousand million stars  
Through days we burn till we fall  
And it's too late to learn

Should fight for your life  
During this everlasting flight  
Rage against the night  
And never be afraid of time

Far beyond the clouds we'll fly high  
Up to the sky with no return  
Leave your trace, seize the light, and its never-ending bright  
Inside your eyes dreams await to come to life

Where we go, how could have been so long  
We're not the same as we were before  
As angels fall, we're reborn  
Breaking our earthly bond

Should fight for your life  
During this everlasting flight  
There's no place for lies  
And no remorse should hold your ride

Far beyond the clouds we'll fly high  
Up to the sky with no return  
Leave your trace, seize the light, and its never-ending bright  
Inside your eyes dreams await to come to life

Far beyond the clouds we'll fly high  
Up to the sky with no return  
Leave your trace, seize the light, and its never-ending bright  
Inside your eyes dreams await to come to life
