

# Until The End

Frozen Crown

As I walk across the valleys of this land unknown  
Off the shores where I left memories grow old  
I can hear the voices of the ones who live no more  
Cheering up, calling us  
Whispering us "don't leave us alone"

As we leave behind mistakes and lessons never learned  
Far away from the place we used to call home  
Moving through the maze of ancient times and hearts of stone  
Fading lights made us blind  
Call of the night mesmerising us

This road will lead to new places, new ground to reveal  
We'll face the wind with no fear in the eyes

It's not the end as long as you're with me  
We'll turn back time and bound it to our will  
Until the end I'll bring it all with me  
The words you said and what you kept within

As I walk across the valleys of this land unknown  
I embrace the new ground treasuring the old  
I'll replace the void inside my heart with a new hope  
Growing up, stronger now  
From today on I'll never be alone

It's not the end as long as you're with me  
We'll turn back time and bound it to our will  
Until the end I'll bring it all with me  
The words you said and what you kept within

This road will lead to new places, new ground to reveal  
We'll face the wind with no fear in the eyes

It's not the end as long as you're with me  
We'll turn back time and bound it to our will  
Until the end I'll bring it all with me  
The words you said and what you kept within
