

## War Hearts

Frozen Crown

Tell me what you dreamed  
Time to make it real  
Angels will give us might

As I gaze at the stars I keep going over and over  
On a path on this memory lane  
Flesh and blood weight less than a soul  
On this bleak battlefield  
Here at the edge of time

We came here as strangers in the storm  
Now we rule as sovereigns dressed in gold  
On a kingdom wasted by the war  
But we'll keep on fighting  
On and on and on

Tell me what you dreamed  
Time to make it real  
Angels will give us might  
In the darkest night  
Armed and dressed to fight  
War hearts ready to strike

I remember the time when I was roaming all alone  
With no reason left for me to stay  
No way out, nowhere to run but then I found the door  
It had been there all along

Right behind the curtain I found them all  
Siblings I had never met before  
Caught by the awakening we've returned  
Burning hearts together  
Beating as one

Tell me what you dreamed  
Time to make it real  
Angels will give us might  
In the darkest night  
Armed and dressed to fight  
War hearts ready to strike

Tell me what you dreamed  
Time to make it real  
Angels will give us might  
In the darkest night  
Armed and dressed to fight  
War hearts ready to strike
