

## Faith Over Your Fear

Frozen Plasma

I have been trying to get out of here  
Away from evil hate and endless fear  
Settle down take a feverish breath  
To be free away from inevitable death

Why do we live our failure to thrive  
On singularity of humanity  
Tireless fight to feel alive  
In a war that leads us to insanity

I hold you my dear  
Nothing to fear  
Salvation near  
Faith over your fear

To see beyond  
A solid bond  
I hold you my dear  
Nothing to fear  
Salvation near  
Another final frontier  
To see and grief  
What lies beneath

Beyond this place full of doubts and tears  
It looms ahead the horror of the shade  
Even though the menace of the years  
It will search and shall find me unafraid
