

## Holy Rose

Fruit Bats

I heard it's getting warm out west  
So you could always come back home  
Back home we still get snow sometimes

But I know you've got a love out there  
So you should tend to them and hope they tend to you  
Love is something that needs tending to

You looked at the smoke  
It was like you'd seen the ghosts of everyone you've ever known  
Hovering over the hills  
You're still from the west coast  
It's the only home you've ever known  
Holy Rose of California

I heard there's been some fires up north  
The old stable burned down  
Thank God they got the horses out  
And I know it's getting hot as hell  
But at least you've got a light to lead the way  
At least you've got a way to warm your face

You looked at the smoke  
As if you'd seen the ghost of a long-lost love  
Somewhere above the lights of the town  
Oh, the old west coast  
It's the only coast you've ever known  
Holy Rose of California

You looked at the smoke  
It was like you'd seen the ghosts of everyone you've ever known  
Hovering over the hills  
You're still from the west coast  
It's the only home you've ever known  
Holy Rose of California  
Holy Rose of California  
Holy Rose of California  
Holy Rose of California
