1234

FTISLAND

Trouble's coming
Trouble making
Right here, waiting
I don't care who you are

Underrated
Over hated
Look, we made it
Up against all odds

Oh, I feel
They try to hold me down
I need to let them know

So I could take you right to the stars
Count it off at 1234
Burn burn burn it you know
Count it off at 1234
Living your life out loud
Give me the love, give me the pain
Give me the sun, give me the rain
Show me the days, show me the nights
Take you on the trip of your life

Foolish finest
Shining brightest
Look, we got this
Don't you worry my dear

My life, don't care
My way, I swear
Way too out there
You just gotta let go

Oh, I feel
They try to hold me down
I need to let them know

So I could take you right to the stars
Count it off at 1234
Burn burn burn it you know
Count it off at 1234
Living your life out loud
Give me the love, give me the pain
Give me the sun, give me the rain
Show me the days, show me the nights
Take you on the trip of your life

Are you ready to go
Taking the long way through the night… it's all right
Take it in it's ok
Nothing more to say
Ready to go
Ready to go

I could take you right to the stars
Count it off at 1234

Burn burn burn it you know
Count it off at 1234
Living your life out loud
Give me the love, give me the pain
Give me the sun, give me the rain
Show me the days, show me the nights
Take you on the trip of your life
