Always believe me
Always believe you

Tell me the truth
Like always
I can't leave you
Always stay by my side
Can't we hold hands
And go together forever?
Can't we go without getting lost?
Sadness that remains in a corner of each of our hearts
Would it interfere with our futures?
I think about it and think about it but fear still remains
So I shout and shout but I can't hear it
In that time, we're just smiling
As if we know that we're gonna overcome
Tell me the truth
Like always
I can't leave you

Always stay by my side
Days we were together
It wasn't that easy
Now let's smile
And laugh together
The sadness that remains on your dark face
I'll hold you so you won't be sad anymore
Much of the past still remains with me
I tried to turn it back but I couldn't
I will care for you, I will love you, so you won't be sad
I'll show you, I'll protect you, our trust
We can smile through many times
We know that we will overcome
We can smile through many times
We know that we will overcome
We know, we know
Always believe me Always believe you
