

Never Again

Fu Manchu

I search for a quiet place to hide
This seems to happen all the time
I look everywhere, high and low
I forgot everything I know
And I will

Never again, never again
Same place where I began
Never again, never again
Now's the time where I give in
Never again, never again
Same place where I began
Never again, never again
I slowly see the end

[?] dust crack where I am
I can see for miles from where I stand
Another day done at the end of the road
I forgot everything I know

And I will

Never again, never again
Same place where I began
Never again, never again
Now's the time where I give in
Never again, never again
Same place where I began
Never again, never again
I slowly see the end

I told you before I slowly see the end
I told you before I slowly see the end
Slowly see the end
Slowly see the end
Slowly see the end

Never again, never again
Same place where I began
Never again, never again
Now's the time where I give in
Never again, never again
Same place where I began
Never again, never again
I slowly see the end
