

Understand

Fu Manchu

Those days and years gone by
And again you feel not fine, not fine
You feel not fine

End up to my side
Sits [?], my ride

No matter what they say
I know you can
I'll give you what I have
Understand, I know you can (gonna make you) understand, I know
you can (either way, I'm goin' to)

Those subtle signs that fail
And again, you will not tell
Not tell, you will not tell

No matter what they say
I know you can
I'll give you what I have
Understand, I know you can (gonna make you) understand, I know
you can (either way, I'm goin' to)

It's always there to remind you
Being everything I could do
The way things have always been
Gonna happen again and again and again...

I can't recall when this began
But I'll make you (understand)
I know you can (gonna make you) understand, I know you can (either way, I'm goin' to)
Understand, I know you can (gonna make you) understand, I know
you can (either way, I'm goin' to)
