Came Down Wrong

Fucked Up

Will you stay
Here in bed with me
Will you never leave
And never be afraid?
In the night that song
It made us fall in love
When the morning comes
You won't come down wrong

You climbed the mount to come back down
So I could smell the rose you found
You saw that glowing place we all wait for
Now hold me, the world is ours

You climbed the mount to come back down
So I could smell the rose you found
You saw that glowing place we all wait for
Now hold me, the world is ours

I heard your voice come from the void and rejoiced

You climbed the mount to come back down
So I could smell the rose you found
You saw that glowing place we all wait for
Now hold me, the world is ours

We found a moment's fire
Made out of ecstasy
Will you stay next to me
Inside this world in irons?
When you find the face of truth
You come back changed
To me you feel the same
Our time became a place

You climbed the mount to come back down
So I could smell the rose you found
You saw that glowing place we all wait for
Now hold me, the world is ours

What if you hate me because
I came back as someone else?
I can't feel you holding on
I think I came down wrong
I'm living in your after-glow
That moment was so long ago
Dreams are the pills that I take
Hoping you'll be there when I wake
