Keep It Away

Fuel

Wasn't I not there for you?
Did I ever let you down?
Did I once ever hurt your heart
Or ever turn away?
Didn't I not bear it for you
Didn't I not wear that crown
Didn't I help you quiet the fears
And keep the clouds at bay

But in your heart, it's still the same
Some things just never change

'Cause I know the pain he caused you
And I know the stars on which you stand
And I know the black you bring, so just
Keep it away, keep it away from me
'Cause I know the pain he caused you
And I know the dark from which you stand
And I know the hell you break, so just
Keep it away, keep it away from me

Keep it away

Did I ever take from you?
Did I ever pull away?
Did I not help you clean the wounds
And help it all to heal?
Someday, maybe you'll know
Bitter winds don't always blow

'Cause I know the pain he caused you
And I know the stars on which you stand
And I know the black you bring, so just
Keep it away, keep it away from me
'Cause I know the pain he caused you
And I know the dark from which you stand
And I know the hell you break, so just
Keep it away, keep it away from me

You know I've tried to see
But there's just no way
The darkness that you bring
Keep it away

'Cause I know the pain he caused you
And I know the stars on which you stand
And I know the black you bring, so just
Keep it away, keep it away from me
'Cause I know the pain he caused you
And I know the dark from which you stand
And I know the hell you break, so just
Keep it away, keep it away from me
Keep it away from me
