Not This Time

You know I put my faith in you (I gave it all to you) There's nothing left for me to prove (There's nothing left for me)

And I won't be there when you fall And I won't care at all Not this time, not this time Not this time, not this time Where you stumble's where you fall And I won't care at all Not this time, not this time Not this time, not this time

So I push myself away (I draw away from you) Sadness left here in my veins (Sadness left for me)

And I won't be there when you fall And I won't care at all Not this time, not this time Not this time, not this time Where you stumble's where you fall And I won't care at all Not this time, not this time Not this time, not this time

And I bled for you (I bled for you) This heart has tried (This heart has tried) The damage you do is what you never realize

And I won't be there when you fall And I won't care at all Not this time, not this time Not this time, not this time Where you stumble's where you fall And I won't care at all Not this time, not this time Not this time, not this time

And I won't be there when you fall And I won't care at all Not this time, not this time Not this time, not this time Where you stumble's where you fall And I won't care at all Not this time, not this time Not this time, not this time
