

Deluminate

Full of Hell

"It's just... And nature here is vile and base. Of course, there's a lot of misery. But it is the same misery that is all around us. The trees here are in misery. The trees here are in misery."

Once more we're thrust
Into the vacuum of God's yawning maw
A dream of human debt repaid

In fear you live and breathe and wait and sleep
Chambers under asphalt buried far beneath the boiling streets
There is not a hand to save you from the hunter's net

Society is a blister on the skin of the planet
Man is a pustule on the face of the Earth
Grace is a harbor for human ugliness
Free will is a barrel in the celestial mouth

When Atom splits and the genome melts
Will Cain cradle Abel? Sudden death
