

## All I Want

### Future of Forestry

I will go where glory meets the crude and weak  
I will go where mercy meets the shame  
I will go where strength will find the small and meek  
I will go where magic meets mundane

And you're all I want, you're all I want  
You're all I'll find, you have my heart forever  
You are all that I could need  
And you're all I want, you're all I want  
You're all I'll find, you have my heart forever  
You are all that I could need

I will go where grace and healing, love restores  
I will go where peace and rest is known  
I will go where friendship finds my heart in yours  
I will go where beauty leads me home

And you're all I want, you're all I want  
You're all I'll find, you have my heart forever  
You are all that I could need  
And you're all I want, you're all I want  
You're all I'll find, you have my heart forever  
You are all that I could need

And you're all I want, you're all I want  
You're all I'll find, you have my heart forever  
You are all that I could need  
And you're all I want, you're all I want  
You're all I'll find, you have my heart forever  
You are all that I could need
