

Amethyst

Future Palace

Everything seems hopeless
A ticking time bomb in my pocket
While I'm battling all this nonsense
The world shatters to pieces
So much ego and injustice
We're all fighting our own monsters
How can we all find a solution
Mental illness and pollution

Somehow the end feels near
Overwhelmed by all these fears

Can I lean on you for now?
(Just a little moment)
Some affection to go on
(To increase endorphins)
Be my Amethyst
Ease this catastrophe
Just a little kiss
Could be a prodigy
Can I lean on you for now?
You're my high in all-time low
You're my high in all-time low

Everyone wants success
Feeling god-complex
Acting all honest
But the truth is unspoken
Who's lying better?
Money or power?
Just a question of time
Until we cross the line

Can I lean on you for now?
(Just a little moment)
Some affection to go on
(To increase endorphins)
Be my Amethyst
Ease this catastrophe
Just a little kiss
Could be a prodigy
Can I lean on you for now?
You're my high in all-time low

Let me look away
I don't wanna feel this pain
This world is driving me insane
Too many greedy people to be blamed

We're going under
Hoping for a wonder

Can we save ourselves
In our created hell?
We really lost the feeling
For our common sense
Burning forests down

Floodings hit the ground
A few degrees that rise
Will ruin our homes

A gloomy sphere
Can we find solutions right before the end appears?

Can I lean on you for now?
(Just a little moment)
Some affection to go on
(To increase endorphins)
Be my Amethyst (be my Amethyst)
Ease this catastrophe
Just a little kiss
Could be a prodigy
Can I lean on you for now?
You're my high in all-time low
