

# Killing Ground

Futurebirds

Well, there's something on me, always keeps me in my head  
And takes me back to someplace I shouldn't go again  
You could be my blessing, and baby, you could be my curse  
And who am I? I can't deny the universe

I'm feeding some hunger like a monster  
And I still taste you from the night before

And it's intoxicating, this poison on your breath  
So kiss me back to life, baby, kiss me to death  
And feel the smoke and ashes: the whole world's burning down  
We flicker like a fire, so dance on the Killing Ground

The time goes by like headlights on the highway  
And I light up as storm clouds in the night  
And I can see those city lights just beyond the hill  
And I hold you tight because I know this time is real

Oh if I had my chance, I would do it all over again  
Find one thing you love and let it do you in  
I'm feeding some hunger like a monster  
And I may die before it's satisfied  
And I can see those city lights just beyond the hill  
And I hold you tight because I know this time is real
