

# Save Me From Myself

Futuristic

Save me from myself tonight  
I'm better off with you in my life  
I'm holding on for one more night  
I'm better off with you in my life

Save me from my self self self self  
Save me from myself  
Save me from myself

Ah  
Save me from myself if it ain't you  
Wipe it from my brain if it ain't true  
Help me when I'm questioning my faith  
Put me in a different place  
Heal the wounds for the break through

Guide me through these emotions  
Put behind me bad thoughts and motives  
Look beside me, help with the notion  
Keep me sober 'way from the potion

Leave me from my previous ways  
Temptation hit me and I need to abstain  
Clean me of all of things that bring weight  
I don't need to obtain

Help me know you in my darkest of days  
When I'm harboring pain  
Eliviate me, let me play in the rain  
And let the stains float off to the drain

Don't leave me, stay  
Please remind me that I need you today  
And when it's dark outside, I say

Save me from myself tonight  
I'm better off with you in my life  
I'm holding on for one more night  
I'm better off with you in my life

Save me from my self self self self  
Save me from my self self self self  
Save me from my self self self self  
Save me from myself  
Save me from myself

You're my one and only  
I'd be lost and lonely  
If it wasn't for your love  
There'd be nothing to hold me together  
I was hoping you'd show me forever

You picked me up all the times I was doubting myself  
Feet on the ground and my heart on the shelf  
Cause nothing seems to last these days  
I swear I need you now and always

Save me from myself tonight  
I'm better off with you in my life  
I'm holding on for one more night  
I'm better off with you in my life

Save me from my self self self self  
Save me from my self self self self  
Save me from my self self self self  
Save me from myself  
Save me from myself
