

We Made It

Futuristic

Yo, look around me dawg, I own the block
If you hatin', I hope you not
I got here with dedication and manifestation
It's been a whole decade always had the coldest drops
A decade before that, I was writin' raps in my room
Talk with my brothers what this money one day actually do
People get it, but they actin' confused but me
I always had a plan, I had to work it now I'm stackin' the loot
I got cribs for the passive, whips for the drive
Been livin' lavish, the kid gotta thrive
Family in the big, house homies by my side
Did it independent, you know that give me pride
You can look into my eyes I'll never lie about how I did it
The happiness is not attached to items that I'm gettin'
Could give it all away and live the same and that's the difference
Everything that I'm spittin' know I penned it and that's how we made it

We made it, we made it
Came a long way from my daddy's basement
Don't pay attention to all the haters
Always knew one day I'd be the greatest
We made it, we made it
We made it, we made it
We made it, we made it, yeah, ayy
We made it, we made it
We made it, we made it
We made it, we made it

Word, I'd rather be more defined than be mortified
No time for fear when you know that there's more to life, it's poltergeist l
ike
How my spirit is felt despite the disturbances
Too many services revealed what christ like, I'm like right? word
I turned to other cheek so many times, I'm out of flesh
Venting like larceny but still got it all off my chest
I deaded folks without the eulogy my nigga true indeed and thruthfully
You wouldn't know what to do if you was me in these situations
Where provolone is pedestaled by niggas on probation claiming family ties
The ones that claim to ride while steering at you losing your drive
Caught red handed with all the finger printing aside
Side note, they say when the real hold you down, you supposed to drown
That quote was dope to the younger folks but I'm older now

We made it, we made it
Came a long way from my daddy's basement
Don't pay attention to all the haters
Always knew one day I'd be the greatest
We made it, we made it
We made it, we made it
We made it, we made it, yeah, ayy
We made it, we made it
We made it, we made it
We made it, we made it
