

## Light My Fire

Gabriel Black

So tell me can you light my fire, woah-oh  
So tell me can you light my fire in the dark  
So can't you help me light my fire in the darkness  
Oh, can't you help me light my fire in the dark, oh  
All I need is a spark

Hot shell to the brain right now  
Screws gone loose in my head, pipe down  
Lights out if you came right now  
City going wild, got the whole hood out, yeah  
Right now, if you came right now  
Feel like rain came, oh the rain came down  
Sweet sound of the drops so loud  
Maybe all we needed was a little bit of drought

So tell me can you light my fire, woah-oh  
So tell me can you light my fire in the dark  
So can't you help me light my fire in the darkness  
Oh, can't you help me light my fire in the dark  
All I need is a spark

Hot shell to the brain right now  
It never rains in this goddamn town  
Pouring wild it's a hurricane now  
Barefoot in the storm, as the lightning hit the ground, yeah  
And I don't mind, no baby I don't mind  
If you're the one to kill me, then I swear I'll be fine  
Sweet sound of the drops so loud  
Maybe all we needed was a little bit of drought

So tell me can you light my fire, woah-oh  
So tell me can you light my fire in the dark  
So can't you help me light my fire in the darkness  
Oh, can't you help me light my fire in the dark  
All I need is a spark
