

Look At You Now

Gabriela Bee

Listen to the music
I want you to know that the storm is over
You were feeling clueless
But all it took was finding a 4 leaf clover

And now you're home
You're safe right now and your family is happy
It goes to show
That nothing lasts forever

I wish you knew
Of what was waiting
It's all for you
Don't feel so jaded
Made it to June
The sun is coming out (out)

Look at you now
You're alive
Oh look at you now
You're alright

When the nights are cold
But the world's on fire
And you're scared to fall cause it feels too high oh

Look at you now
You're alive

Remember what you told me
You felt like everybody you love's gonna leave you
But are you really lonely?
Or did you forget
You're surrounded by people who love you for you?

When you lash out cause you're scared of your feelings
They won't ignore you
Cause nothing lasts forever

Oh look at you now
You're alive
Oh look at you now
You're alright

When the nights are cold
But the world's on fire
And you're scared to fall cause it feels too high oh

Look at you now
You're alive

Now you see me
Now they see me
Now I see me
Now I see me

Now you see me

Now they see me
Now I see me
Now I see me

Look at you now
You're alive
Oh look at you now
You're alright

When the nights are cold
But the world's on fire
And you're scared to fall
Cause it feels too high oh

Look at you now
You're alive

Listen to the music
I want you to know that the storm is over
You were feeling clueless
But nothing lasts forever
