

# Kill Ourselves

Gabriella Cilmi

Back then there was one, now that there is none  
You can't sink lower down  
Mountains don't just fall because you want it all

Put that all to bed, paradise in your head  
Ain't as good in the flesh and if you got your turn  
You probably would have run out, run out

You can't change what's happened when it happens to you  
Be careful what you wish for cause it just might come true  
Can't you see, you and me, we just kill ourselves sometimes

Since the beginning, we've been murdering, the killing kind never miss  
Shoot one down again when the world waltzes in

You can't change what's happened when it happens to you  
Be careful what you wish for cause it just might come true  
Can't you see, you and me, we just kill ourselves sometimes

Where there's happiness accidents can happen  
There aint nothing that you can do about  
Cross your fingers and hope that someone else's luck has run out

You can't change what's happened when it happens to you  
Be careful what you wish for cause it just might come true  
Can't you see, you and me, we just kill ourselves sometimes
