

## Cold Sober Moment

Gabrielle

Can't change the hands of time  
All the wrongs you did won't be put right  
You can't get parted from the truth  
Lying to yourself it's just no use

What goes around comes around  
Like a wind to knock you down

It will be a cold sober moment  
When you realize there's no us  
It'll be a cold sober, cold sober moment  
When you lost everything that you loved

For the many times that you get away  
With not treating me right  
I always said I'd walk away  
But I mean it now, I just can't stay

What goes around comes around  
Like a wind to knock you down

It will be a cold sober moment  
When you realize there's no us  
It'll be a cold sober, cold sober moment  
When you lost everything that you loved

Life can be a lonely place  
Left alone with your mistakes  
How will you feel when it's too late  
You lost everything cause you wouldn't change

What goes around comes around  
Like a wind to knock you down

It will be a cold sober moment  
When you realize there's no us  
It'll be a cold sober, cold sober moment  
When you lost everything that you loved  
Oh you really loved

Life can be a lonely place  
Left alone with your mistakes
