

Rainbow

Gabrielle

It sounds a little cliché
But that is never us
From the moment my eyes saw you
You had to be the one
Not always on the same page
But there's no denying love
Every moment I'm here with you
Is more than enough

You know exactly what you mean to me
All your colours shine so clearly

And your love is like a rainbow
It shines on me
It feels complete
When I'm with you that's all that matters
You light up my life
Makes everything so bright
Your love's like a rainbow

Only you can read me
'Cause I'm your open book
There's nothing you don't know about me
Or ever overlook

You know exactly what you mean to me
All your colours shine so clearly

And your love is like a rainbow
It shines on me
It feels complete
When I'm with you that's all that matters
You light up my life
Makes everything so bright
Your love's like a rainbow

Shining bright (A rainbow)
Full of colour
Makes me feel right (A rainbow)
You inspire
Lift me higher (A rainbow)
That's your love
Full of colour
That's your love

It feels so sweet, yeah
When I'm with you that's all that matters
You light up my life
Makes everything so right
Your love's like a rainbow
Shining bright
Full of colour
