

Lighters (Remake)

Gabz

Put your lighters in the air
If you've ever felt scared
'Cos you've lost the one, who was the one
Put your lighters in the sky
If you're sleeping alone tonight
'Cos you've lost the one

You were my best friend and girlfriend all at the same time
It's funny to think I've known you my whole life
I can't even remember a time we weren't together
Thinking back to the time we promised it would last forever
We only just learnt what love was
So how the hell did I mess it up cos'

I'm sitting here wondering where does the love go
Only thing I have is a voice and a lighter so

Put your lighters in the air
If you've ever felt scared
'Cos you've lost the one, who was the one
Put your lighters in the sky
If you're sleeping alone tonight
'Cos you've lost the one, who was the one
The one, the one
The one, the one

You were so young you couldn't even say it
Our dates were at the park on the swings or just playing
Well I remember everything that you wrote
Will you go out with me? On a post it note
I wrote yes and I gave it back
You said I could keep it I've still got that

Now I'm sitting here wondering where does the love go
Only thing I have is a voice and a lighter so

Put your lighters in the air
If you've ever felt scared
'Cos you've lost the one, who was the one
Put your lighters in the sky
If you're sleeping alone tonight
'Cos you've lost the one, who was the one
The one, the one, the one, the one

Back then it was so different
I didn't even have to ask and you'd listen
We'd been a couple since forever
It's so weird that we ain't together
And every time I see you I wanna cry
And every time you look at me I die inside

Now I'm sitting here wondering where does the love go
Everyone grab your lighters if they left you alone, so

Put your lighters in the air
If you've ever felt scared
'Cos you've lost the one, who was the one

Put your lighters in the sky
If you're sleeping alone tonight
'Cos you've lost the one, who was the one
The one, the one
The one, the one
The one, the one, the one
