

Singularity

Galahad

Beyond Event Horizon to the point of no return
There's no looking back, normal rules don't apply
Stretching further in the distance where everything is merging
Matter doesn't matter, as it's stripped to nothing at all

Lost in infinity, I've reached singularity
You can't touch me now
Lost in eternity, I've reached singularity
You can't catch me now
I'm at one in my universe

It's a race against time, but the view is sublime
And I didn't expect to be so content in my mind
I'm floating in my space, my body unwinds
In a state of calm reflection, it's just a matter of time

Lost in infinity, I've reached singularity
You can't touch me now
Lost in eternity, I've reached singularity
You can't catch me now
I'm at one with my universe
I'm on my way home, where my heart lies
You'll always be with me
Forever Together
We are singularity
Forever Together....
