

Brainwaves living in stills  
Nightmares just floating on film  
You found it in the white lies in the back of your mind  
And you know it's not the same reel that you dusted off before

So slide it in a tape deck  
Put it in a VCR  
Show me how you got in this predicament  
Did the devil let you down?  
I could tell you it's the apex  
I could tell you it's the Al hamra  
Take another shot of your adrenaline  
And pray you get that far

Sharp turns covered in skin  
I bet the black gates just letting you in  
You want another sure thing, a super 8 dream  
But you know this ain't a classic or one you've ever seen before

So slide it in a tape deck  
Put it in a VCR  
Show me how you got in this predicament  
Did the devil let you down?  
I could tell you it's the apex  
I could tell you it's the Al hamra  
Take another shot of your adrenaline  
And pray you get that far

(It came on paddle boats  
Upon arrival we tried so hard to flee  
It followed)
