

Mystic Death

Gallows

You need to be afraid
As life's luxé dulls everyone leaves
We'll have found our place
Gone together under the waves

She will be my flame
You mean nothing to me
She will be my flame
You mean nothing

Even bad dreams
Are too good, they're too good
Even bad dreams are
Too good, too good for you
Even bad dreams
Are too good, they're too good
Even bad dreams are
Too good, too good for you

You need to be afraid
Desolation will be your godhead
I've been promised heaven before
All the colours in the darkness
Crawl back inside her
With love that's shattered
Crawl back inside her
With love that's cold

Even bad dreams
Are too good, they're too good
Even bad dreams are
Too good, too good for you
Even bad dreams
Are too good, they're too good
Even bad dreams are
Too good, too good for you

Cut the chord
Walk into the sky
Like a world I've never known
It's all there when I close my eyes

And what's left mirrors what went before
And what's left mirrors what went before
And what's left mirrors what went before
And what's left mirrors what went before

Mystic Death
Mystic Death
Comes for us all
Mystic Death
Comes for us all

Even bad dreams
Are too good, they're too good
Even bad dreams are
Too good, too good for you
