

# Whisper In The Red Sky

Galneryus

When the night meets the day, I will watchin' the red sky  
Heart the whisper of wind  
Take a power that never end

History tells a lie  
We don't believe the Darkest Age  
Change the time of the gloom  
We just fight for the freedom

From the past i'm hearing  
There is a voice that's calling me  
Just feel the fire it's never end  
On through the night, we are striding on and on

Hear voices in the heat  
Spreading your wings and fly away  
I just feel your power of the steel  
So I'll never die  
In the heat  
Spreading your wings and fly away  
I just feel your power of the steel  
So I'll never die

No one can stop the force  
The assault must go on and on  
Change the world with the power of steel  
We are alive

From the past I'm hearing  
There is a voice that's calling me  
Just feel the fire it's never end  
On through the night, we are striding on and on

Hear voices in the heat  
Spreading your wings and fly away  
I just feel your power of the steel  
So I'll never die

From the past I'm hearing  
There is a voice that's calling me  
Just feel the fire it's never end  
On through the night, we are striding on and on

Hear voices in the heat  
Spreading your wings and fly away  
I just feel your power of the steel  
So I'll never die  
In the heat  
Spreading your wings and fly away  
I just feel your power of the steel  
So I'll never die
