Shine On

Gamma Ray

We drive, we drive, we're riding on through the universe We've come to reach our destination planet earth We come, we run, you cannot see us, flying in our spaceships, shooting 'cross the sky We explore and we all know what this is about for us all

So many light years we have travelled far from home Someday we'll be there I know

Shine on, Rising star
We travelled such a long way
But still you seem so far
Shine on, Rising star
for our belief in unity at heart
Rising Star
Come on and shine

Living was torture and dying release A declining world, no future, no hope We were passing the point of no return

So many light years, still we travel on and on And someday we will call you home

Shine on, Rising Star
Diamond in the distance, still you seem so far
Shine on, Rising Star
Forever light the darkness in our hearts
Rising Star, Rising Star

Salvation, Damnation We crawl across the sky with pain Forever we will fly

Out in the darkness There's a never ending light Still we are far away But we'll be there one day Someday we will call you home

Shine on, Rising Star
We travelled such a long way
but still you seem so far
Shine on, Rising Star
Forever light the darkness
in our hearts
Rising Star, Rising Star

Shadows in the darkness, so far away from home Standing all alone, noone there beside me

Shadows all around, so far away from home I know I'm not alone, it seems we're lost in space and time Shine on

Shine on now, and warm the tears

we've shared through years
It's our prison, final reason for the freedom
and the glory that we feel
Are you for real?

Shine on, Rising Star Diamond in the distance Still you seem so far Shine on, Rising Star Forever light the darkness in our hearts Rising Star, Rising Star Shine on, Rising Star Come on and shine for us Shine on, Shine forever more Shine on, Our survival Rising Star, the last chance for us all The only hope for future and a home For us all For us all Come on and shine, Rising Star
