

No Gods No Masters

Garbage

Be kind, beware
Be good, don't be scared
Nothing lasts and no one stays
The same forever, so accept the change

Where the wind blows, round and round in circles
Where the wind blows, round and round in circles

The future is mine just the same
No master or gods to obey
I'll make all the same mistakes

Save your prayers for yourself
'Cause they don't work and they don't help
The things we do, the things we don't
The things we love, the things we lost

Where the wind blows, round and round in circles
Where the wind blows, round and round in circles

The future is mine just the same
(Where the wind blows, round and round in circles)
No master or gods to obey
(Where the wind blows, round and round in circles)
I'll make all the same mistakes
(Where the wind blows, round and round in circles)
Over and over again
(Where the wind blows, round and round in circles)
Over and over again
(Where the wind blows, round and round in circles)

All our friends, all our lovers, all our babies
All our friends, all our lovers, all our babies

The future is mine just the same
(Where the wind blows, round and round in circles)
No master or gods to obey
(Where the wind blows, round and round in circles)
I'll make all the same mistakes
(Where the wind blows, round and round in circles)
Over and over again
(Where the wind blows, round and round in circles)
Over and over again
(Where the wind blows, round and round in circles)

You want what's mine, I want what's yours
I want what's mine that once was yours
You want what's mine, I want what's yours
I want what's mine that once was yours

Over and over again
(Where the wind blows, round and round in circles)
Over and over again
(Where the wind blows, round and round in circles)
Over and over, over and over
Over and over again
(Where the wind blows, round and round in circles)

The future is mine just the same
No master or gods to obey
