

Dynamite

Gareth Emery

Watching the sky light fall to black
Feeling like the lights never coming back, no
When it's dark, and there's no one
I will be here, I'll be here

And its all for you
Every spark in every flame
All for you
And all the stars they know your name

Light a blazing light, ready to ignite
We are made of dynamite
Fireflies falling through the night
We are made of dynamite

Light a blazing light, ready to ignite
We are made of dynamite
Fireflies falling through the night
We are made of dynamite

Light a blazing light, ready to ignite
We are made of dynamite
Fireflies falling through the night
We are made of dynamite

Blazing light
We'll show
Blazing light
We'll show
