

Never Before

Gareth Emery

Been running from you all my life
Now I know I only wasted time
Guess I had to go to the dark side
To find my way to the light

Cause now I want to, I want you like
Never before, never before
Come and get me I'm ready like
Never before, never before

Been running from you all my life
Now I know I only wasted time
Guess I had to go to the dark side
To find my way to the light

Cause now I want to, I want you like
Never before, never before
Come and get me I'm ready like
Never before, never before

Put my heart now in your hands
Cause now I understand what it was all for like
Never before, never before
Like never before, never before
Like never before, never before
