

Vertigo

Gareth Emery

Run faster
Telling me to work harder
What comes after, we've made it to the end?

And I don't want to let you know me
It's dangerous to get too close
You won't even recognize me
It's easier to let me go

I'm burning
All around me flames close in
No returning, when we've made to the end

And I don't want to let you know me
It's dangerous to get too close
You won't even recognize me
It's easier to let me go

High above the stars now, want to cry my heart out
Don't know why I'm feeling so alone
Walking on a tight rope, looking for the right road
Don't know how to shake this vertigo
High but so low, I just can't let go
Falling through the stars now, gonna cry my heart out
Tell me is it me or Vertigo?

And I don't want to let you know me
It's dangerous to get too close
You won't even recognize me
It's easier to let me go

High above the stars now
High above the stars now
And I don't want to let you know me
It's dangerous to get too close
High above the stars now
Tell me is it me or Vertigo?
