

Headlights

Garrett Kato

All those memories came flooding back in
But I don't recall just who I was way back then
I've got something that I'm proving to myself
I let you go not because of someone else

Now I gotta stay strong and put me to the test
Oh you're begging me just look at what we had
Ain't nothing gonna change the way things are
Where you been hiding darlin that's not who you are

My Girl
Who you been out looking for
Head lights in the window looking through your door
My girl where been going late at night
I've heard almost everything you can't lie

All the little things that we used to say
Gonna take them back and put em in the grave
All the late nights fading ourselves out
Same results we are nothing to us now...

Said I couldn't fill those shoes that you need
Oh my darling, you like my heart to bleed
All I'm saying is that we aren't who were
Strange distance growing thicker getting worse

My Girl
Who you been out looking for
Head lights in the window looking through your door
My girl where been going late at night
I've heard almost everything you can't lie
