

Digging through his face to find out, what you look like
Ten thousand years we walked and we tried
The pinhole cameras flashing lights in space
And that's two worlds light years away

But that is a trouble with this
That is a trouble with this

So I'll keep it in mind
This heart burning siren keeps us alive
But how can we be alone?
Then I feel alone all the time

Amazing light shining from afar
This impossible creature that took its form
And all my eyes they couldn't believe
This strange looking thing just stared at me

But that couldn't exist
That couldn't exist

So I'll keep it in mind
This heart burning siren keeps us alive
But how can we be alone?
Then I feel alone all the time

What's the deal with that?
What's the deal with you?

So I will keep it in mind
This heart burning siren keeps us alive
But how can we be alone
Then I feel alone all the time

What's the deal with that?
What's the deal with you?
