

Eleven

Gary Barlow

I wanna talk, so let me talk
I wanna find another pace now instead of a walk
Take our relationship to another level
We've been cruising long enough so it's now or never

Share with me some late night drinking
Some forward-thinking
Don't give me warning till the bell stops ringing
It's all about you and me
I wanna keep this feeling warm
I don't want this to freeze

Let's make it our anniversary
New Year's Day or New Year's Eve
A celebration, festivity
All with you right next to me

Eleven
Let's take this up to eleven
Oh, just four higher than seven
Dance all night until the sunrise
Aiming high so baby hold tight
Don't look down till we're in heaven
Let's take this up to eleven

I wanna dream, so let me dream
I wanna build this building higher than we've ever been
For us to look up and be climbing higher
Sending skyward, never-ending
Be unstoppable, anything's possible
Just one roll of the dice and we could have it all
Look, the future's bright
Let tonight be the start of a new life

Let's make this our ceremony
A festival or jubilee
To recognise where we are and where we've been
All with you right next to me

Eleven
Let's take this up to eleven
Oh, just four higher than seven
Dance all night until the sunrise
Aiming high so baby hold tight
Don't look down till we're in heaven
Let's take this up to eleven

Know we can get there in our own sweet time
But in this life
Lightning never strikes in the same place twice

I wanna talk, so let me talk
I wanna find another pace now instead of a walk
Take our relationship to another level
We've been cruising long enough so it's now or never

Let's make this our anniversary

New Year's Day or New Year's Eve
A celebration, festivity
All with you right next to me

Eleven
Let's take this up to eleven
Oh, just four higher than seven
Dance all night until the sunrise
Aiming high so baby hold tight
Don't look down till we're in heaven
Let's take this up to eleven
