

You Make The Sun Shine

Gary Barlow

You make the sun shine right there after midnight
Just faintest glow, I always know
You're somewhere out there in the dark sky

You make my day bright, standing in your spotlight
No, I never planned these empty hands
Forever you will be on my mind

'Cause where you are I know the sun is shining every day
And when I'm lost and need a guide, you'll show me the way
I hope you're safe there in the unknown
I hope you're closer than I'll ever know

You make the sun shine when you smile so bright
Now the sun can shine for every day of my life

You make the sun shine as you open your eyes
Everything's ablaze, clears the morning haze
Making way for blue skies

And from nowhere you appear and go and save the day
But 'cause I can't hold your hand, you know I have to say
If you're scared there in the unknown
Just put your head upon my pillow

You make the sun shine when you smile so bright
Now the sun can shine for every day of my life

Ooh
Yeah oh

Oh, 'cause where you are is only ever just a blink away
And when I come to visit it will be the best holiday
So if it's raining I can shelter you
Something I've always wanted to do

You make the sun shine when you smile so bright
Now the sun can shine for every day
Can shine for every day of my life
