

Hyperwave

Gary Clark Jr.

Let's change the world, tear our views apart
Before we fade away, can we hit the restart?
Go catch a wave, let the water flow
Start searching for answers no one really knows
I want something exciting, I don't know what it means
Briquettes and funny business
Stereophonic epiphany

I'm all a wreck
Sunglasses trip, riding on a hyperwave
I can feel it now, heading towards a brighter day
You can come along, you can come along with me
Why don't you come along, why don't you come along?

Can't escape the sounds of the city now
They just go on and on

I've left this place transcended on
Shut out all the noise, took the rest back home
Expand your mind, let the colors flow
Start searchin' for answers no one really knows
Found beneath the ether wave
Found behind bloodshot eyes
Your soundtrack of our conscious
I'm watching you from the other side

I'm all a wreck
Sunglasses trip, riding on a hyperwave
I can feel it now, heading towards a brighter day
You can come along, you can come along with me
Why don't you come along, why don't you come along?

Can't escape the sounds of the city now
They just go on and on

I'm all, I'm all a wreck
Sunglasses trip, riding on a hyperwave
I can feel it now, heading towards a brighter day
You can come along, you can come along with me
Why don't you come along, why don't you come along?
All a wreck
Sunglasses trip, riding on a hyperwave
I can feel it now, heading towards a brighter day
You can come along, you can come along with me
Why don't you come along, why don't you come along?

Can't escape the sounds of the city now
They just go on and on
Can't escape the sounds of the city now
They just go on and on
