

This Is Who We Are

Gary Clark Jr.

(What happens to a shooting star?)
(What happens to a shooting star?)
(What happens to a shooting star?)
(What happens to a shooting star?)
(What happens to a shooting star?)
(What happens to a shooting star?)

Uh, I wake up late from this bed again
Does the sun only rise just to set again?
That darkness always creeps in
Don't make me question the
I'm not who you thought I was
Really came up from the bottom, came up from the mud
I walk through the valley in the end
Better check your ego, come again

A little bird told me I'm too loud
A little bird better shut their mouth
I walk by the side of the kings tonight
Let me show you how to rise, rise

This is who we are, go on and hate me
I've showed you all my scars
As I walk through rain and fire for you lately
Burning like a shooting star, now this is who we are

I move fast, quick flash, it'll light you up
You move slow, quick flash, it'll burn you up
Can't talk down to me, wanna stay up
Give me space, give me time, go on and back it up
Back door thinking bad with your battle axe
I'ma go show Katana blade battle ah
If I'm gonna do it, know I gotta do it right
Y'all better go ahead kiss that ring at night

A little bird told me I'm too loud
A little bird better shut their mouth
As I walk by the side of the kings tonight
Let me show you how to rise, rise

This is who we are, go on and hate me
I've showed you all my scars
I walk through rain and fire for you lately
Burning like a shooting star, now this is who we are

This is who we are
This is who we are
This is who we are
This is who we are
This is who we are

This is who we are, go on and hate me
I've showed you all my scars
I walk through rain and fire for you lately
Burning like a shooting star, now this is who we are

This is who we are

This is who we are
This is who we are
This is who we are
This is who we are
(This is who we are, go on and hate me)
(I've showed you all my scars)
(I walk through rain and fire for you lately)
(Burning like a shooting star, this is who we are)
