

Superfuture

Gary Go

How much do I need to be happy
I've been pouring my heart out and no one's noticed
I'm creating a world I can live in
One where everyone's loving and forgiving
Should be keeping my cards close to my chest
Cause when they know what you love
They know how to hurt you best
You can't start to protest
You can't stop the process,
I've been blindfolded and spun around
And I don't know which direction to run

But I'm wishing you a superfuture
It was never my intention to hurt somebody
Maybe I'm not ready to lose you
But I'm wishing you a superfuture, superfuture

You don't know who you want to be
Well you won't find who you are in another me
I'm on my path and running
And I can't stop cause you're not coming
So many electronic friends, when will your evolution end?

I'm wishing you a superfuture
It was never my intention to hurt somebody
Maybe I'm not ready to lose you
But I'm wishing you a superfuture, superfuture

I've been blindfolded and spun around
And I don't know which direction to run

I'm wishing you a superfuture
It was always my intention to hurt nobody
Maybe I'm not ready to lose you
But here's to a superfuture

I'm wishing you a superfuture
It was never my intention to hurt somebody
Maybe I'm not ready to lose you
But I'm wishing you a superfuture, superfuture
