

# Happiness

Gary Lewis & The Playboys

Happiness to some is an ice cream soda  
And happiness is when a workin' day is over  
But when she holds me close  
And whispers in my ear  
I know happiness is when my girl is near

Happiness to kids is some peanut butter  
And happiness can be one thing or another  
But when her lips meet mine  
It's really easy to see  
That true happiness is when she's kissin' me

Happiness is when she finds a place  
For just we two  
With lights turned low and fear takes off  
I try to bring her happiness, too

Happiness for me was so easy to find  
It's happiness knowin' that she'll always be mine  
And as I'm in her arms  
And gazin' at the stars above  
I've got happiness because I've got her love

And as I'm in her arms  
And gazin' at the stars above  
I've got happiness because I've got her love

I've got happiness because I've got her love  
I've got happiness because I've got her love  
I've got happiness because I've got her love  
I've got happiness because I've got her love
