

Time Stands Still

Gary Lewis & The Playboys

Time stands still
I guess it always will
Since I don't have you
By my side

Nights grow long
With memories of you
A love I thought was true
Now it's gone

Yeah, I'm talking about
The old hands on the clock
When you're tired
Of all these growing rot
I'll still be thinking of you

And I'll still sing this song
But just remember
Through the years
I'll always love you as I sing

Time stands still
I guess it always will
Since I don't have you
By my side

Nights grow long
With memories of you
A love I thought was true
Now it's gone
