

## In Some Room Above the Street

Gary Stewart

There's no place for us to hide  
In the neon world outside  
So I suppose we'll always meet  
In some room above the street  
The city lights glow on the shade  
But they can't find the love we've made  
It's strange that love can come so sweet  
In some room above the street  
In some room above the street  
Like thieves and beggars when we meet  
We'll wake before the break of day

Then like the night we'll steal away  
And I can make it through the hours  
I spend with mine and you with yours  
Cause when I close my eyes I see  
You in some room above the street  
[ guitar ]  
In some room above the street...  
But if he wants your love tonight  
Don't turn away don't hurt his pride  
Just close your eyes and think of me  
In some room above the street
