

I'm in a tunnel, foot on the gas
I see these demons hoping I'll crash
All that I wanted like the last laugh
Gotta move fast, get to the back
And I saw the signs for so long
Just a reminder to hold on
Ain't gonna cry or go home
Stay strong, yeah

Walls keep closing in, closing in
I keep going in, going in
Say that I'm gonna be the first
But they're praying that I won't last
And you know that

I get better when I want to get better

I get better when I want to get better
I get better when I want to get better
If you do it good, I'ma do it better
If you do it good, I'ma do it better

Always on my grind, it's 24/7, I don't settle
Why demand my respect 'cause they'll finesse you if you let 'em
Told myself I was the champion, winning, got the medals
I showed the world my true colors and they was black and yellow
I let the past be the past I'm on a new level
It's hard to pick which car to drive I got a few of 'em
The first to make it 'cross the line like a true winner
'Cause if you knew better, then you do better
Yeah, yeah, yeah, hahaha...

'Cause I get better when I want to get better

I get better when I want to get better
I get better when I want to get better
If you do it good, I'ma do it better
If you do it good, I'ma do it better

Chosen one, born to shine
I can't stop one more try
I know that it's my time
(I let the past be the past I'm on a new level)
No regrets, born to shine
I can't stop one more try
I know that I'll be fine
And you know that

I get better when I want to get better
I get better when I want to get better
If you do it good, I'ma do it better
If you do it good, I'ma do it better
