

## When You Fall (Interlude)

GASHI

I been through it all, my love  
Stars we wish upon fall like us  
And I don't always pick up every time that you call  
But if you could just trust us  
I'll catch you when you fall

Safety net  
I know that you can't see it, but it's there when you need it  
Don't play me as  
A villain in a movie 'cause you're afraid to lose me  
I mean it  
I never kept a secret, even with a reason  
Empty bed, this empty bed

Why can't love just be enough?  
I turned it all down and you turned it up  
Why can't we see past the gun?  
You shoot me up, shoot me down, but I don't run

I been through it all, my love  
Stars we wish upon fall like us  
And I don't always pick up every time that you call  
But if you could just trust us  
I'll catch you when you fall

Driving just to get my mind straight  
On my [?]  
It's a downhill, no brakes  
Palm trees keep swinging and you keep relieving  
There's a chip on your shoulder  
Wake me up when it's over

Oh, why can't love just be enough?  
I turned it all down and you turned it up  
I just wanna go and see my son  
When I get close, you burn me up, burn me up

I been through it all, my love (I been, I been through it all)  
Stars we wish upon fall like us  
And I don't always pick up every time that you call  
But if you could just trust us  
I'll catch you when you fall
