

# Cigarette Break

Gavin James

Just a cigarette break, leave the ashes on the fire escape  
To burn away all the words we wanna say  
I'm counting down every breath you take  
It's just a cigarette break  
Little fires, little talks and ticking clocks  
Will take me higher, but you're the one I'm dreaming of  
When all these moments pass away  
Just a little too late

Oh, but I saw a spark  
And I've never seen a more beautiful thing  
Am I just dreaming?  
Let's take it too far  
'Cause every word you say colours me in  
And should we begin before it's too late?  
Say that you'll take a cigarette break

So innocent, but lies they always hurt the most when  
The truth gets bent, I'm trying hard to make some sense  
With all the words that you said  
Was it all in my head?

But I saw a spark  
And I've never seen a more beautiful thing  
Am I just dreaming?  
Let's take it too far  
'Cause every word that you say colours me in  
And should we begin before it's too late?  
Say that you'll take a cigarette break

And all these emotions ruling my head  
They won't let me sleep, they won't let me sleep  
They're keeping me awake  
From such a beautiful mistake

But I saw a spark  
And I've never seen a more beautiful thing  
I guess I was dreaming  
We took it too far  
'Cause with every word that you said, you reeled me in  
When it was nothing, I guess it's too late  
Oh, this bitter taste was just a cigarette break
