

Last Year

Gavin James

Call it love, or call it off
Just enough is not enough for two
But waking up was easier with you
Now waking up is the hardest thing to do

And I've been thinking back to last year
But all that's left is a photograph
I've been thinking back to last year
And I just want to know how the hell we got here
Now this house it feels so cold
When you were here it was a home
Let's go back to last year
Back when you were here

Picture frames and winter coats
They're left around like little notes from you
I put your records on, sing same old songs
Thinking when we were younger
You're long gone

And I've been thinking back to last year
But all that's left is a photograph
I've been thinking back to last year
And I just want to know how the hell we got here
Now this house it feels so cold
When you were here it was a home
Let's go back to last year
Back when you were here

I know it's so hard to let go
But I wish you the best
But my heart says something else
Please just take me back to last year
Please just take me back to last year
'Cause my head's a wreck, my heart's a mess
I guess we weren't built to last

Take me back to last year
Just take me back to last year
When you were here
Take me back to last year
When you were here
